

Devesh Pal

Software Developer | Platform Development | API Integration | SDK Development

Location: India

Email: newdev0@outlook.com

Professional Summary

Software Developer with expertise in AI integration, automation, and developer tooling. Demonstrated success in building scalable applications and performant systems. Specializes in SDK development, API integration, and platform architecture. Active open-source contributor focused on Telegram bots, Twitter integrations, and Switch platform development.

Professional Experience

SwitchX

Founding Member

Remote

June 2023 - Present

- Platform Development

TypeScript

SDK Development

System Architecture
- Core founding member of SwitchX platform, focusing on developer tools and infrastructure development
 - Architected and engineered key SDK components enabling seamless integration with the platform
 - Collaborated with stakeholders to define platform architecture and developer experience strategies

Switch Labs

Developer Library Lead

Remote

July 2023 - Present

- Python

SDK Development

API Integration

Technical Documentation
- Led development of client libraries and SDKs for the Switch platform
 - Designed and implemented consistent APIs across multiple programming languages
 - Created comprehensive documentation and provided developer support
 - Optimized library performance and reduced implementation complexity

Open Source Contributions

2022 - Present

- Python

TypeScript

JavaScript

Collaboration
- Project Lead & Core Contributor
- Led TgTwitterStreamer project (86 stars, 69 forks) for streaming Twitter content to Telegram
 - Core contributor to Ultroid project (2.8k stars, 7.9k forks), delivering key features
 - Developed integration systems and automation tools for social media platforms

Technical Skills

Programming Languages	Frameworks & Libraries	Core Competencies
Python Advanced	Telegram Bot API Expert	SDK Development Expert
TypeScript Advanced	Twitter API Advanced	API Integration Expert
JavaScript Advanced	Pyrogram Advanced	Bot Development Expert
Dart Intermediate	Telethon Advanced	Automation Advanced
HTML/CSS Proficient	Node.js Intermediate	System Architecture Intermediate
	React Intermediate	Documentation Advanced
	Three.js Intermediate	

Featured Projects

Enviro - Climate Fintech Application

[GitHub](#)

JavaScript React Native Climate Fintech Rapyd API Mobile Development

Mobile application built for the Rapyd Climate Fintech Hackathon. Designed to help users track and reduce their carbon footprint through integrated payment solutions. Integrated Rapyd API for transaction processing and analytics.

switch-ts - TypeScript SDK

[GitHub](#)

TypeScript SDK Development API Integration Documentation

Comprehensive TypeScript client library for Switch platform development. Features include type-safe API interactions, middleware support, and extensive documentation. Enables developers to integrate with Switch platform services efficiently.

SpotifyIG - Media Integration

[GitHub](#)

Python Spotify API Instagram API Automation

Automated solution that connects Spotify and Instagram, automatically creating and uploading Instagram stories from currently playing Spotify songs. Implements both platform APIs with authentication handling and media processing.

Professional Certifications

Natural Language Processing with Azure AI

Microsoft (April 2024)

Intelligent Document Processing with Azure AI

Microsoft (March 2024)

Postman API Student Expert Certification

Postman (February 2024)

Azure AI Vision Solution Development

Microsoft (March 2024)

Generative AI with Azure OpenAI Service

Microsoft (March 2024)

Strategic Problem Solving & Innovation

LinkedIn Learning (November 2024)

Professional Focus

- AI/ML integration in enterprise applications
- Developer tooling and automation solutions
- Open-source project development and contribution
- 3D visualization and interactive platforms
